

# Loadcell Module DLA2

## Data Sheet

THE A+T DLA2 Loadcell module is an element of a new A+T instrument processor system.

It also provides a direct replacement for the now discontinued B&G Fastnet Loadcell Amplifier

It will also provide an additional configurable linear channel input.

### Main Features

- Fantastic accuracy, stability and noise immunity
- 9-32v DC supply
- Bluetooth for firmware updates and for setting up sensors and channel details/descriptors
- Stand alone links loadcell to existing B&G H2000 and H3000 systems
- 5v DC refence output for linear sensors (e.g. stringpot)

### Warranty and support

- 2 years warranty is offered on A+T products on return to factory basis
- Warranty starts from earliest date first used or 1 year after leaving factory
- 24/7 telephone support is provided direct from A+T Instruments Ltd
