DLA2 Loadcell Module

A+T DLA2 Loadcell module is an element of an A+T instrument processor system

The A+T DLA2 provides a direct replacement for the now discontinued B&G Fastnet Loadcell Amplifier. It will also provide an additional configurable analogue channel input (0-5v or 0-16v)

- Fantastic accuracy, stability and noise immunity
- 9-32v DC supply
- Bluetooth for firmware updates and for setting up sensors and channel details/descriptors
- Stand-alone links loadcell to existing B&G H2000 and H3000 systems
- Connects directly via Ethernet to ATP processor
- 5v DC supply for linear sensors (e.g. string pot)

Ordering information

- p/n ATDLA05 for Ethernet version
- p/n ATDLA02 for Fastnet version

- 3 years warranty, see details on A+T website
- 24/7 telephone support.
